

DJ-7000 BRIDGE JACK

SKU 5175325

DESCRIPTION

7,000-lb. Capacity / Rolling Bridge Jack

Dannmar's DJ-7000 Rolling Bridge Jack has a 7,000-lb. lifting capacity and is a great addition to compliment a four-post lift. A rolling bridge jack, when properly placed at the vehicle's undercarriage lifting points, allows you to raise a vehicle up and off of the four post lift's drive-on runways. This allows the user to gain access for repairs such as tire, brake, suspension, and more.

SPECIFICATIONS
