

LR-4A ARM KIT

SKU 5210944

DESCRIPTION

LR-4A Arm Kit fits DLR-6 and DLR-6P / Includes Four Arms, Set of 3" Rubber Blocks, and Set of 6" Rubber Blocks

Reach farther and gain inside access to chassis lift points with this optional Dannmar LR-4A Arm Kit. Raising a vehicle from a low-rise lift sometimes requires reaching various chassis points that are vertically difficult to contact. If the necessary lifting areas on a low-rise lift do not set in line with the lift points, this kit provides farther reach toward the center of the chassis to contact areas that do.
