

MB-240X BALANCER

SKU 5140161

DESCRIPTION

Manual Wheel Balancer / Manual Spin and Brake

Dannmar offers precision wheel balancing capability powered with a manual hand-spin and priced at a fraction of the cost of most other balancers. The MB-240X is a great choice for small shops or car hobby garages. By easily rotating a large crank (similar in appearance to a large wing-nut) attached to the Post Mount wheel balancer's axis, you simply spin the wheel and observe the electronic digital display of information. Then add the required weights to achieve a perfect balance.

SPECIFICATIONS
