WSA-100 WORK STATION

SKU 5210438

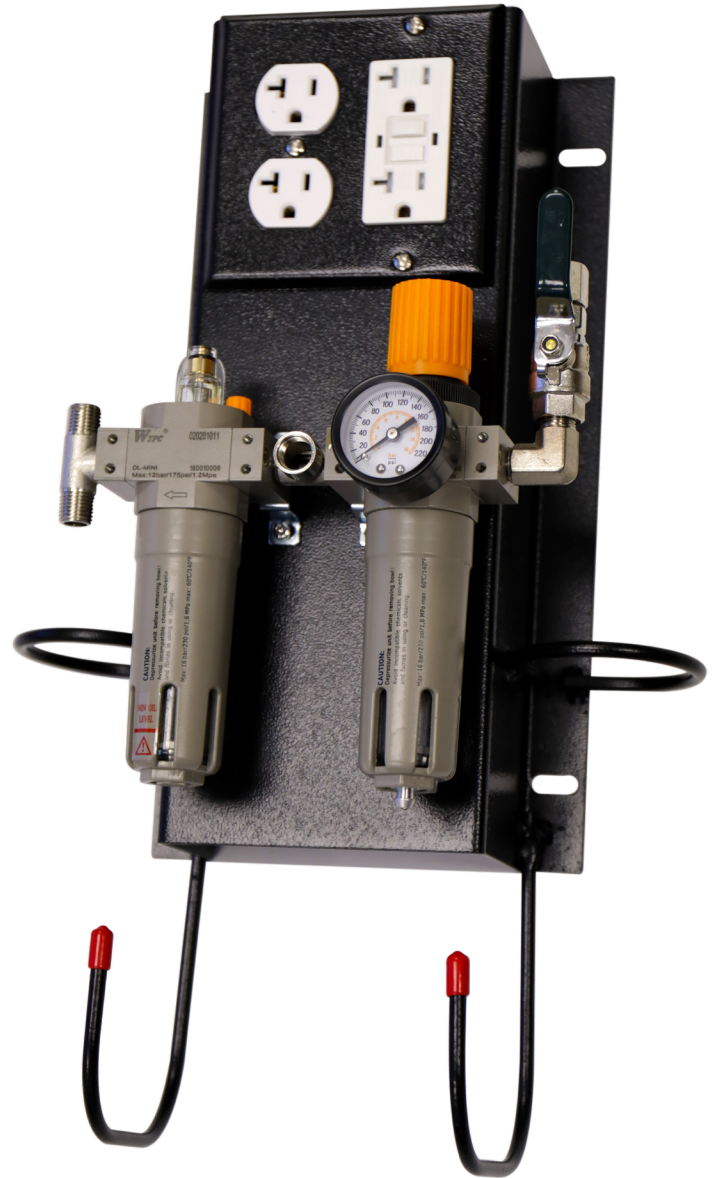

DESCRIPTION

Air-Electric Work Station / Fits Two-Post and Four-Post Lifts

Dannmar's industrial-grade WSA-100 utility station places air and electric sources where you need it, right on your two-post or four-post lift. When you have a vehicle on the lift, your hours count. With Dannmar's Air/Electric Station you have your own source of air and electric and don't need to be concerned with running an air hose or power cord through another bay-or worse yet waiting for someone else to stop using it. This is a must-have addition to any automotive lift in the shop or garage.
